

KNOW THE RISKS AND BE PREPARED

Avalanche Safety Guidelines

GET THE GEAR: Ensure everyone has an avalanche transceiver, shovel, and probe on their person and knows how to use them.

GET THE TRAINING: Take an avalanche course.

GET THE FORECAST: Make a riding plan based on the current avalanche and weather forecast.

GET THE PICTURE: If you see recent avalanche activity unstable snow exists. Riding on or underneath steep slopes can be dangerous.

GET OUT OF HARMS WAY: One at a time on all avalanche slopes. Don't go to help your stuck friend. Don't group up in runout zones.
