Snowmobile Safe Ride Checklist	14

The theme of International Snowmobile Safety has never been more appropriate than now. The International Snowmobile Manufacturers Association, that unites all four snowmobile manufacturers, has developed the responsible snowmobiling program titled: **Safe Riders! You make snowmobiling safe™**. All snowmobile associations / federations, clubs, affiliates, government administrators, and enthusiasts are encouraged to participate in the program. Materials that are available include: posters, fact books, a safety video, public service announcements, a web site and decals that highlight safety messages and enhance safety education efforts.

We hope that you will find this Campaign Action Manual useful in your organization's Snowmobile Safety Campaign. The suggested activities contained in this manual can be modified to meet your club's needs. Any suggestions or ways to improve this manual are welcome. Have a great snowmobile season!

The Situation

Snowmobiling is a fun and exciting family activity enjoyed by over 4 million people across the United States and Canada. The sport is a safe and an enjoyable form of recreation if done properly and with respect.

The purpose of International Snowmobile Safety Week is to expose people to safe snowmobiling practices and to demonstrate how operating safely can prevent mishaps. The activities and promotions contained in this informational piece stress safe and responsible snowmobiling.

Safe Snowmobiling Means...

1. Never consume alcohol or drugs before or during snowmobiling.
2. Become familiar with the snowmobile you ride.
3. Operate at safe and reasonable speeds.
4. Stay on trails and areas where snowmobiling is permitted.
5. Avoid travel on unfamiliar frozen bodies of water.
6. Using extra caution at night.
7. Keep your snowmobile properly maintained.
8. Become familiar with the terrain you will travel on.
9. Listen to the weather forecast before you leave.
10. Always wear a helmet and proper clothing.
11. Never riding alone, and letting someone know where you are going and when you plan to return.
12. Carrying emergency supplies and learning survival skills.

Organizing a Campaign

There are many individuals and organizations who care about snowmobile safety. To name a few:

- Volunteer snowmobile safety instructors
- State and Provincial snowmobile safety instructors
- Health care professionals
- Organizations
 - International Association of Snowmobile Administrators
 - American Council of Snowmobile Associations
 - Canadian Council of Snowmobile Organizations
 - International Snowmobile Manufacturers Association
 - State Associations and Provincial /Territorial Organizations
 - Individual Snowmobile Clubs
 - International Snowmobile Media Council

A number of campaigns aimed at safe snowmobiling have been developed and implemented by various snowmobile organizations. In 1995, the International Snowmobile Manufacturers Association endorsed a campaign titled: **Safe Riders! You make snowmobiling safe™**.

This slogan highlights the industry's desire to encourage safe snowmobiling. The effort is coordinated from the International Snowmobile Manufacturers Association office located in Haslett, Michigan. Ed Klim, President of ISMA, states Arctic Cat, Inc.; BRP, Inc.; Polaris Industries, Inc. and Yamaha Motor Corporation have joined together in this unique program.

All snowmobile associations/federations, clubs, affiliates, government administrators and enthusiasts are encouraged to participate in the program. Posters, fact books, and decals highlighting the logo and slogan, along with key issues pertaining to safe snowmobiling, will be distributed this snowmobiling season at Snow Shows throughout North America. Industry members are encouraged to use the slogan and logo in their publications to expand the safety message to snowmobilers of all ages.

Safe Riders! has available a safety training DVD as well as printed, audio and video Public Service Announcements for distribution to your local newspapers, radio and television stations. For further information, please contact the International Snowmobile Manufacturers Association at www.snowmobile.org.

GRASS ROOTS EFFORTS

The combined efforts of industry, government and volunteers in this *International Snowmobile Safety Week* campaign is unprecedented; the assistance of the 3,000 + local clubs across the snowbelt is critical to its success. **YOU** know what can work in your individual community better than anyone else, and your help is vital.

FORM A COMMITTEE...

Each club should assemble a committee to work on the *International Snowmobile Safety Week* campaign. One person cannot do all the work, and if the duties are divided among a committee, it makes everyone's load lighter and goals easier to accomplish. Are there other organizations in your community whom you can involve in this effort? Combine forces whenever possible. The duties can be divided as such:

Committee Chair Coordinator

Make assignments, oversee activities, find other community organizations to participate.

Publicity Coordinator

In charge of dispersing information: poster distribution, news releases, advertising.

Activities Coordinator

You may need several people to fulfill these duties. Develops and coordinates activities and events.

Spokesperson

Pick a person who likes to talk, and knows what they're talking about! This person could visit various organizations in the community (schools, emergency services, service clubs) to speak on snowmobile safety. A club member who is Volunteer Instructor for the Snowmobile Safety Course may be a good candidate for this position.

Sponsor Coordinator

This person will contact various sources for sponsorship of projects that will need funding, manpower, etc.

CALENDAR

It's never too soon to start planning! Get your committee in place as soon as possible.

September/October 2015

- Committee members should be designated.
- Make a list of possible activities, participating organizations, and sponsors. Begin contacting them now!
- Each committee should have confirmed plans and budgets.
- Develop a list of required supplies (posters, pamphlets, event prizes, news releases, PSAs, etc.) and a budget. Confirm sponsors and sources of funds. Order supplies.
- Clubs, through the State Association and state/provincial snowmobile safety/trail administrator, should prepare a Proclamation for your Governor to officially declare January 16-24, 2016 as *International Snowmobile Safety Week*. (Sample on page 12)

November/December 2015

- Produce a program of events and distribute copies to all participating organizations, sponsors, media.
- Distribute pamphlets, posters, programs.
- Mail out news releases, public service announcements, invitations to events.

January 8 - 15, 2016

- Distribute additional handouts, posters, etc.
- Confirm activities participants.
- Confirm scheduled media coverage.
- Send out press releases.

January 16 - 24, 2016

- **INTERNATIONAL SNOWMOBILE SAFETY WEEK**
- Hold press conference, safety events, rides, etc.

February 2016

- Send thank you notes, follow-ups, and replies.
 - Events and activities may continue throughout the winter.
 - Enjoy the snowmobile season!
 - Have follow-up meeting and critique.
 - Formalize your yearly planning cycle.
 - Begin planning for the year 2017 Safety Week.
-

ACTIVITIES...

There are numerous activities that can be hosted to promote *International Snowmobile Safety Week*. Some ideas are listed below, but do not feel limited to these - you may have better ideas of your own!

Don't overdo it! Select one, maybe two projects that your club members would like to be involved in and do them well. Don't try to do too much or no one will have fun.

Snowmobile Safety Course

Your club can sponsor a safety education course, which results in the certification of participants. Contact the Snowmobile Safety Training Coordinator for your state or province - or your club safety trainer can hold an abbreviated class.

Snowmobile Safety Seminar

Work with a dealer in your area and host an open house at a dealership. Set up displays for viewing, have a program of events such as guest speakers, videos, and demonstrations.

Snowmobile Safety Clinic

Get a local snowmobile dealer or garage to co-sponsor this event. Invite people to bring their machines for a safety inspection. Have mechanically-inclined club members assist with maintenance questions and techniques. Serve non-alcohol refreshments.

Sponsor a 'Safe Ride' or a 'Take a Friend Snowmobiling' ride

This event may be possible during December if adequate snowfall has arrived in your area. This type of event is a great way to introduce and promote snowmobiling to members of the community or government who are not snowmobilers. This is a good time to invite a non-snowmobiling friend or family member to "Go Snowmobiling" and get started safely.

Make arrangements for use of machines from dealers and club members. Invite elected officials, emergency service personnel and the media. Serve lunch on the trail. Take participants to scenic places with interesting histories or on groomed and ungroomed trails. Make sure everyone is properly dressed.

For a complete Checklist on how to hold a Safe Ride, see the last page of this manual.

Displays

Set up a display in the civic center, in a mall or any other highly visible location. Have club members man the display during busy times. Hand out pamphlets and information on safety.

Publicity...

Remember, **repetition** is important when sending the safety message. More than one publicity strategy will be needed to get the message to everyone.

Public Service Announcements (PSAs)

Newspapers, Radio, TV

The International Snowmobile Manufacturers Association has several types of PSAs that can be used during *International Snowmobile Safety Week* and throughout the season. Broadcast ready video PSAs and radio ready PSAs are available. They are 30-second spots, highlighting key safety issues.

News Releases and Stories

News releases are informal articles about things that are happening. Produce your own news releases on activities that you are planning. Make sure you send them 2-3 weeks ahead of the activity. (samples are provided in this publication)

Establish contacts with local media whom you can call on to cover your activities. If no one can attend, write your own story, take black and white photos, and submit them as soon as possible for publication. Invite your local Visitors Bureaus and Chambers of Commerce to partner with you.

Use your web site and your Facebook page to promote your safety week event.

Safety DVDs

The Safe Riders safety DVD is available for distribution and showing. It can be used by your local network or cable system. Many in-house resort/hotel and school systems will also use the safety video if you provide them with a copy.

Posters, Fact Books and Decals

Safe Riders![™] fact books, posters and brochures are available. Contact the ISMA office at www.Snowmobile.org for an order form for products.

Contact your government Snowmobile Safety Administrator or state or provincial snowmobile organization for additional materials that may be available.

New snowmobilers and those interested in trying snowmobiling should visit the updated site www.GoSnowmobiling.org .

Partners

Involve as many organizations and individuals as you can. Co-sponsors can contribute time or funding for projects.

Potential sponsors, and ideas for how they can participate include:

Snowmobile Businesses

Dealerships, repair shops or aftermarket suppliers can provide vehicles for trail rides, technical assistance and location for a Safety Clinic, and donate prizes for contests.

Community Organizations

The Chamber of Commerce, conservation commission, planning board, Rotary Club, Lions Club, Police Department, tourism organizations, school or emergency services can co-sponsor a safety seminar and provide location and man/woman-power.

Private Industry and Business

Many snowmobilers are in private industry that may be able to provide support. They can also provide funding for specific activities such as printing, advertising, awards or refreshments. Partner with your local business partners who are a part of the snowmobiling community such as: Banks, restaurants, gas stations, ski-hills, etc.

SPOKESMANSHIP

The spokesperson for *International Snowmobile Safety Week* can be a very busy person. Types of speaking programs that can be set up are:

- MEDIA INTERVIEWS:** **Radio, TV, Newspapers**
Prepare a list of questions that you can provide to the interviewer that will make him or her sound knowledgeable. Bring facts and figures with you - practice reading them and answering questions before your first interview. Be familiar with local safety concerns and issues.
- COMMUNITY ORGANIZATIONS**
Arranging a speaking engagement to inform members of *International Snowmobile Safety Week* can be a first step towards getting the group to participate as a sponsor. Use visual aids, such as slides, overhead transparencies, handouts or a short video to highlight your presentation.
- SCHOOLS**
Make arrangements to visit schools and do short presentations for students during *International Snowmobile Safety Week*. Gear the presentation to the ages of the students and use visual aids.

Tips on Public Speaking

- Be ready to explain *why* you are sponsoring a Safety Week.
- Be proud of your task - safety *is* important, after all.
- Be sincere and enthusiastic.
- Know your subject matter.
- Dress professionally, neatly and comfortably.
- Carry lists of names, addresses and phone numbers of industry contacts.
- Practice speaking with a tape or video recorder.
- Use written notes on key items to cover.

TIPS FOR THE COMMITTEE CHAIRPERSON

- Make lists, put everything in writing: who is in charge of each duty, specifically what they are doing and deadlines for accomplishing each step. Make sure all committee members get their assignments in writing and know what each other is doing. Avoid duplication of efforts.
- Make contact with other clubs and organizations in the area to find out what they are doing. You may want to avoid having events on the same day, or you may decide to combine efforts and put on an event jointly.
- Follow up regularly with committee members with assignments to make sure they are on track and are meeting the pre-determined deadlines. Be prepared to provide assistance or re-delegate work if it is not progressing as necessary.
- Coordinate your efforts with your Government Snowmobile Safety Education Program Administrator. Make contact early on in your campaign planning stages and find out what else is happening around the state, and if any materials or additional guidance is available.
- If things are not going as planned, reassess your campaign. Take a look at what you can actually accomplish and concentrate on those projects. It is always best to do a few really good events rather than many mediocre or poor events.
- Use your leadership skills to their greatest potential! Be as polite and diplomatic as possible. You are not a boss - you are working with volunteers!

SNOWMOBILE SAFETY AWARENESS WEEK JANUARY 16-24, 2016

In observance of International Snowmobile Safety Week, (*Governor/ Premier _____*) has proclaimed January 16-24, 2016 as (*State/Province*) Snowmobile Safety Awareness Week.

Snowmobile Safety Awareness Week will be observed by the (*_____ Fish and Game Department*) the (*State/Province Snowmobile Association*) and it's (*#*) member snowmobile clubs. Numerous events and activities are scheduled to take place this week, including Snowmobile Safety Courses, clinics, and seminars. Exhibits will be on display at shopping centers and snowmobile dealerships throughout the state.

(*_____ thousand*) snowmobiles are registered each year in (*State/Province*) and operated by (*100,000 ±*) men, women and children of all ages. Depending on weather conditions, approximately (*#*) of snow-covered trails are maintained and groomed by snowmobile club volunteers across the state/province, and enjoyed by a variety of winter recreationists including cross-country skiers, dog sledgers, winter hikers, and snowmobile enthusiasts.

Activities and events held during Snowmobile Safety Awareness Week will promote responsible attitudes and actions that will foster the safe, family image of snowmobiling.

“Safe Snowmobiling means riding within your own capabilities, operating at safe and appropriate speeds for the terrain, and never drinking alcoholic beverages before or while driving,” says (*Name, President of the _____ Snowmobile Association*). “Always wear a helmet and adequate clothing, stay within designated riding areas, and always snowmobile with another person, never alone.”

Occasionally problems occur, and snowmobilers should be prepared for all possibilities. “Take along a spare belt, spark plugs and tools to do basic repairs. You also should carry emergency supplies, such as a basic first aid and overnight survival provisions such as food, matches, flashlight and extra batteries, and shelter building materials,” recommends (*quotable source*.)

“Most importantly, always use common sense and keep a clear head. Learn all you can about responsible snowmobiling and keep safety as your top priority.”

(include a list of scheduled events and activities.)

News Release

For immediate release

Date: _____, 2016

Contact: _____,

Title: _____

Assn./Club: _____

Telephone: Day - ____ - _____, Evening - ____ - _____

Fax: ____ - _____

Snowmobile Safety Clinic Scheduled

To celebrate *International Snowmobile Safety Week* which is January 16-24, 2016, the _____ (*club/association*) will be sponsoring a "Snowmobile Safety Clinic" on _____ (*day*), _____ (*date*), from _____ (*time*) AM to _____ (*time*) PM at _____ (*location*)

:-

Most snowmobile enthusiasts know that their snowmobile needs an annual pre-season inspection each year before hitting the trails. Certain mechanical components need to be inspected or adjusted to insure a safe and trouble free riding season.

Members of the _____ (*club/association*) will be available to assist participants who need advice and guidance on just what to adjust and how to perform basic snowmobile service. _____ (*business*) technicians will also be on hand to answer questions about maintenance and repair.

Participants are encouraged to bring their own tools and snowmobile owner's manual. Advice and assistance are free, parts and supplies are available for purchase.

For additional information please contact: _____ (*contact person/phone*) _____.

Safe Ride Checklist

1. Contact ISMA and obtain Safe Riders! Material that can be used for the invitation as well as the function. The material to include: *Fact Books, Posters, DVD.*
2. Choose a weekday preferably immediately after or during safety week to encourage safety awareness before the season and accidents begin. **(Thursday is the best day for the media.)**
3. Pick the location and the route. Points to consider when choosing a route:
 - a. Ease of access to the media and legislative attendees and the public to include ease access for TV filming, radio, etc.
 - b. Direct route from that point to the luncheon location.
 - c. Route not longer than 50 km (30 miles) in length.
 - d. Route needs to be properly marked and groomed. If you can not properly groom or mark the route, do not hold safe ride.
 - e. Have police escorts especially for crossing roads, and to highlight the safety effort - not only to the media but also to the police who need to be involved with the enforcement.
4. Start time: at 10:00 AM with brief statements and introductions. Start the ride and have lunch at 12:30 PM. Hold a short training program after the luncheon, and then a short ride back to the starting point with a possible wrap up around 3:00 PM.
5. Theme: The theme of the ride should be a "Safe Ride" and should highlight the fact that all interested individuals will be able to participate. Safety must be the main theme and you must give a safety update before the ride ever begins and all individuals riding must ride in a safe manner. No alcohol can be served anywhere around during or after the program.
6. Lunch: The lunch should be sponsored by a non-alcohol partner or sponsor, as well as any breakfast or rolls and coffee in the morning. Have a guest speaker on snowmobile safety.
7. You need to obtain snowmobiles and snowmobile clothing from dealers or other club members for individuals to use while participating on the ride.
8. Coordinate the activity with the local club and state/provincial association and ACSA and /or CCSO and ISMA should be knowledgeable of the effort.
9. Contact the manufacturers' representatives through the dealers and ask to have one manufacturer rep at the ride.
10. Send out invitations at least 2-3 weeks prior to the ride. They need to be personally signed, including an agenda. Be as specific as possible and have phone numbers to contact. Also in the letter, highlight exactly what the event is going to be - A Safe Ride. Highlight on the invitation individuals that you think will be attending (i.e.: manufacturers reps, elected government officials, etc.) and that there will be a hands on demonstration of safe riding techniques and a **Safe Riders!** Class presented for all individuals. Invitation lists should include but not be limited to: *All media in the area - radio, TV, newspaper, Association and club members and their publications; National Association newspapers should be contacted - they may have stringers that are available to show up and cover the program; Elected politicians and staff; Key national and or state/provincial organization members such as: Safety Trainers in your area who must be supportive of the effort and must be participating and join with you in sending out the invitations, manufacturers, suppliers and service companies involved in the market area in the industry.*
11. Follow up with phone calls and send out follow up information once individuals contact you, to include maps of where you are going to be, etc. Once you build your list of who is participating, you may want to send out a second invitation to the media highlighting for them who is attending the event to encourage their attendance.
12. Immediately after the ride, send out thank you notices to develop a good working relationship with the media and government types - ***your follow up with them is imperative.***
